

AktiMate Now Available in New Zealand

Orange Road (www.orangeroadaudio.com) is now importing and distributing AktiMate in New Zealand. Epos developed AktiMate in Australia with the help of two renowned British Audio companies of outstanding audio pedigree; Epos and Creek. AktiMate systems are often referred to as iPod speakers but they are designed first and foremost for high performance sound. Being an active speaker there is no need for an amplifier as it is built in. With a universal power supply the speaker can be used anywhere in the world.

MICRO: 40W Class D amplifier driving 100mm woofers and a switch for iPod/iPhone, USB or 3.5mm jack plug input. The USB connection is for direct link to a PC for playback use. (Black, Red or White Gloss).

MINI: 40W amplifier driving 130mm woofers. Can connect to an iPod/iPhone, MP3/MP4 player, CD player and Tuner and television speakers as they are fully shielded. Includes a remote control. (Black, Red or White Gloss).

MAXI: 60W amplifier driving 165mm woofers. In addition to all the features of the Mini, the Maxi has FM radio, WiFi Streaming, Internet Radio and an alarm clock. Available in March/April 2012.

Award	Product	Publication	Date

Best Desktop Speaker	Maxi	What Hi-Fi	2010
High commended Best iPod Dock	Mini	Live Magazine London	2010
Product of the Year (Best desktop speaker)	Mini	What Hi-Fi	2009

'Build and finish are exemplary... Vibrant and exciting, the Micros offer punchy dynamics and a spacious, well-organised soundstage. Treble sounds attack crisply, the mid range is detailed and communicative, and the bottom end has the sort of substance and textural variation that all-in-one iPod docks can only dream about. Integration of these elements is smooth, and the Aktimates time a thumping dance tune as competently as they unravel a full-scale symphony orchestra'. What Hi Fi 2011

'Surprising amount of detail and a soundstage that exhibits good projection away from the speakers, something that the majority of docks just cannot do'. Hifi Plus
